

Accelerate Your Cardiac Imaging Reads

Expedite Patient Care

Rising Demand for Time-Sensitive Cardiac Imaging Studies

The rising demand for cardiac imaging has added to cardiologists' already busy clinical schedules, increasing their workload with additional study interpretations—often resulting in delays in study turnaround times.

Dedicated Specialty Trained Readers Relieve Pressure

Relieve the burden on your cardiologists by entrusting imaging interpretations to our board-certified moonlighters. This shift allows your staff to focus on high-acuity procedures, patient care, and revenue-generating outpatient clinics, while we deliver quality reads with faster turnaround times to help accelerate patient treatment.

Benefits For Your Program

- ✓ Seamless integration into your platform
- ✓ Improved bandwidth to grow
- ✓ Faster turnaround time for better patient care
- ✓ Optimized workflow for enhanced physician and staff satisfaction

Imaging Study Types

CTA: Pre-TAVR and Congenital
MR: Cardiac and Congenital
Echocardiogram
Electrocardiogram
Holter Monitor
Nuclear SPECT
PET/CT
Vascular Ultrasounds: Aorta, Carotid, and Renal

Benefits For Your Patients

- ✓ Timely and accurate imaging results
- ✓ More face-to-face time with cardiologist
- ✓ Shortened length of stay with quicker treatment
- ✓ Better overall patient experience
